DETAILED ACTION

Election/Restrictions

This application contains claims directed to the following patentably distinct species:

Species I, claims 1-7, 13, 15, 16, 19, 21, 23, 25, 27, and 29, teaches an ink jet ink composition comprising three substituents, wherein none of the three substituents contain an alkyl group having at its terminal one of $-\text{CO}_2\text{M}$, and $-\text{SO}_3\text{M}$ in which M represents an atom or atomic group selected from hydrogen, an alkali metal, an alkaline earth metal, an ammonium group and an organic amine group.

Species II, claims 8-12, 14, 17-18, 20, 22, 24, 26, 28, and 30, teaches an ink jet ink composition comprising three substituents, wherein at least one of the three substituents contain an alkyl group having at its terminal one of $-\text{CO}_2\text{M}$, and $-\text{SO}_3\text{M}$ in which M represents an atom or atomic group selected from hydrogen, an alkali metal, an alkaline earth metal, an ammonium group and an organic amine group.

The species are independent or distinct because Species I teaches none of the three substituents containing one of $-\text{CO}_2\text{M}$, and $-\text{SO}_3\text{M}$ in which M represents an atom or atomic group selected from hydrogen, an alkali metal, an alkaline earth metal, an ammonium group and an organic amine group and Species II teaches at least one of three substituents containing an alkyl group having at its terminal one of $-\text{CO}_2\text{M}$, and $-\text{SO}_3\text{M}$ in which M represents an atom or atomic group selected from hydrogen, an alkali metal, an alkaline earth metal, an ammonium group and an organic amine group .

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, none are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.
MPEP § 809.02(a).
